

# **TESLA MediaBox XT750 - Android TV multimedia player and DVB-T2 set-top box**

- DVB-T2 H.265 (HEVC) reception
- Android TV™ operating system
- Ultra HD 4K player
- Chromecast support
- voice search

**A modern 2-in-1 device that contains a multimedia center with a certified Android TV operating system and a set-top box with support for DVB-T2 H.265 (HEVC) for receiving terrestrial television broadcasts.**

## Chromecast built-in

### **Wireless sharing of content from a mobile phone or tablet**

Chromecast built-in™ is a practical technology with which you will be able to stream your favorite multimedia entertainment and applications from a mobile phone, laptop or tablet directly to the TV screen.

This way you can project photos and videos from your vacation, a movie from an online rental company, or a music video from YouTube. Using this function is very easy - on your device, which must be connected to the same Wi-Fi network as the TESLA MediaBox XT750, launch an application that supports Chromecast . Tap the Chromecast icon on the app screen and within seconds you'll see exactly what you have on your device. In addition, you can continue to work on it or do anything else while the selected multimedia content is playing on your TV.

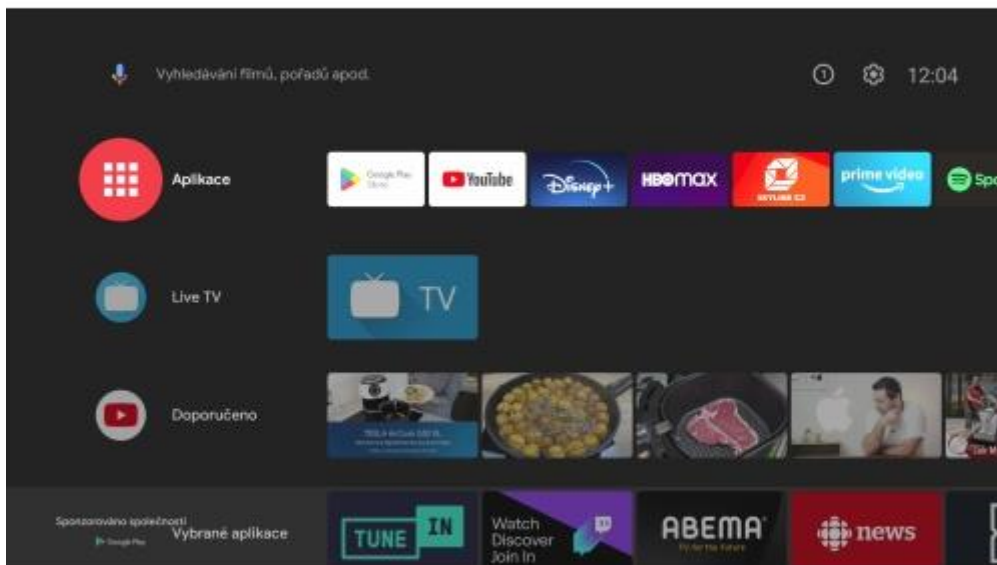

## **Remote control and mirroring from your phone**

Through the Google Home application, all display content from your mobile phone or tablet can be easily transferred to the television screen via the TESLA MediaBox XT750. You can thus mirror an Internet browser, games or any other applications. In the same way, it is possible to control the device from a mobile phone or tablet via the application.

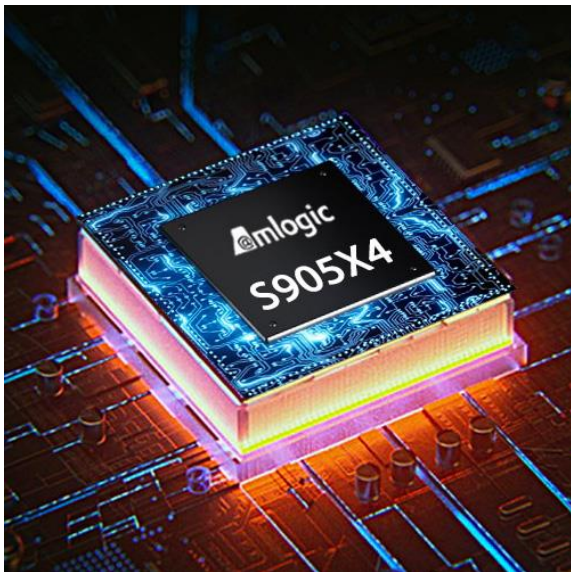

## Perfect 4K HDR picture

The modern technology hidden inside the multimedia center ensures that you can watch films, series and videos in Ultra HD 4K resolution. In addition, HDR technology ensures high contrast dynamics. This will make the image look more realistic, as if you were actually seeing it live.

## A number of applications for all members of the household

Absolutely everyone can choose from the huge range of applications from Google Play. Movies and series will be provided by well-known online video rental or streaming platforms Disney+, HBO MAX, VOYO.cz, Prime Video (Amazon) and many others. MediaBox is the ideal choice for receiving Internet TV via the applications Skylink Live TV, Kuki, SledovaniTV , AntikTV , Telly , Vodafone TV, T-Mobile TV GO, Lepší.TV and others. IPTV programs can also be included in the TV list to those already tuned in from DVB-T2. The YouTube, Spotify or Deezer apps take care of music and never-ending fun . You can also play games or use other applications with rich multimedia content - Televize Seznam, iVysílání, Kodi , Red Bull TV.\*

## High performance for smooth operation

The high-quality ARM Cortex-A55 processor in combination with 2 GB of RAM guarantees smooth operation even when watching 4K content. The advantage is the support of the H.265 (HEVC) codec, which, based on compression, can ensure similar image quality even with less data consumption.

## Built-in DVB-T2 tuner

TESLA MediaBox XT750 is equipped with a DVB-T2 H.265 (HEVC) tuner, thanks to which it is possible to watch your favorite terrestrial TV stations via a classic antenna. Czech teletext, electronic program guide (EPG) and TimeShift are available.

Úprava seznamu kanálů

| NO. | Název kanálu    |
|-----|-----------------|
| 1   | CT 1 HD T2      |
| 2   | CT 2 HD T2      |
| 3   | CT 24 HD T2     |
| 4   | CT sport HD T2  |
| 5   | CT :D/art HD T2 |
| 6   | CT 3 HD T2      |
| 7   | CT 1 SM HD T2   |
| 8   | CT 1 JM HD T2   |

The advertisement features a central image of the TESLA MediaBox XT750 device, a black rectangular box with a green power button and several indicator lights. Above the device, a large screen displays the Android TV interface. The interface is split into two panels: the left panel shows a home screen with icons for 'Applikační', 'Live TV', and 'Doporučena', along with a 'TUNE' button; the right panel shows a channel list titled 'Úprava seznamu kanálů' with a table of channels. The background is a light gray gradient.

## A sound that draws you into the story

Dolby Audio with support for Dolby surround sound reproduction Atmos are a guarantee that listening to music or watching movies and series will be of the highest quality.

### Internet connection

#### Bluetooth a 5G WiFi připojení

The multimedia center can be connected to the Internet using a classic Ethernet cable (RJ-45 connector) or via DualBand Wi-Fi. It therefore supports both the slower 2.4 GHz and the faster 5 GHz.

### Integrated Bluetooth

Bluetooth wireless technology allows you to connect not only the included remote control, but also other devices - wireless mouse or keyboard, gamepad, headphones and others.

- quad-core processor ARM Cortex-A55 @ 2000 MHz
- GPU ARM-G31 MP2
- Android TV 10 operating system
- 2 GB DDR3 memory
- 16 GB eMMC internal memory
- DualBand Wi-Fi 802.11/b/g/n/ ac 2.4G/5G
- LAN 10/100Mb/s, RJ-45
- Bluetooth 4.2 - support for connecting a wireless keyboard, mouse, headphones or gamepad
- HDMI-CEC function
- the possibility of recording programs from DVB-T/2 broadcasts (.ts format, playable on a PC)
- video decoding: 4K @60fps 10-bit H.265, 4K@60fps VP9 Profile2, 4K@30fps H.265/HEVC, HDR
- resolution support up to Ultra HD 4K (60 Hz)
- support for HDR10+, HDR10, HLG and Technicolor HDR processing
- Dolby Audio (Dolby Digital, Dolby Atmos)\* \*
- a wide range of applications from Google Play\*
- voice search
- support for connecting a USB flash drive, external hard drive or memory card (microSD, max. 64 GB)
- DVB-T2/C tuner (ETSI EN 302 755 standard)
- support online firmware update (OTA)
